- Monitored revenue and expenditures while preparing accurate financial reports.
- Collaborated with the Entrepreneurship team to support sustainable business operations.

National-Level Web Development Competition

- Assisted in planning and executing a national-level web development competition.
- Developed event run-downs and technical regulations to support event operations.
- Coordinated with multiple divisions to ensure smooth event implementation and participant management.
- Served as the Master of Ceremony (MC) for the final round.

PROJECTS

RASA - Backend Developer*April – June 2026**Academic Project – Mobile Programming & Application Interface Programming*

- Developed the backend of a Flutter-based elderly monitoring application that provides real-time motion, location, and weather information.
- Designed and developed RESTful APIs using C# and MonsterNet, integrating OpenWeatherMap and OpenStreetMap APIs to process and synchronize application data.
- Managed database operations and enabled real-time communication between the elderly and family mobile applications.

Tech Stack: C#, MonsterNet, REST API, PostgreSQL, OpenWeatherMap API, OpenStreetMap API

SIMPROK - Web Developer*August – December 2025**Academic Project – Web Programming*

- Developed SIMPROK, a web-based information system for managing organizational work programs and document administration.
- Contributed to backend development, database implementation, and software testing while collaborating with the development team.
- Built responsive web application features using Laravel and PostgreSQL.

Tech Stack: Laravel, PostgreSQL

PurePond - UI/UX Designer*March – June 2026**Academic Project – Modern Agroindustry Software Development*

- Designed the user interface and user experience for PurePond, an IoT-based mobile application for monitoring water quality and automating water replacement in catfish ponds.
- Created user flows, wireframes, and interactive prototypes to deliver an intuitive and user-friendly mobile experience.
- Collaborated with developers to ensure the implemented interface aligned with the proposed design.

Tools: Figma

TECHNICAL SKILLS

Programming Languages: C#, PHP, Java, Dart, SQL, HTML, CSS, JavaScript

Framework & Technologies: Laravel, Flutter, RESTful API, API Integration, MVC Architecture

Database: PostgreSQL, MySQL, Database Design

Tools: Git, GitHub, Postman, Visual Studio Code, VisualStudio, pgAdmin, Figma, Canva, Microsoft Office

Soft Skills: Problem Solving, Communication, Teamwork, Leadership, Time Management, Project Management, Adaptability
